Please amend the application as follows:

In the Claims

Claims 1 and 20 have been amended and are presented below in amended form. New Claims 45-51 have been added. In accordance with 37 C.F.R. § 1.121(c)(1)(ii), amendments to the claims are indicated in the attached "Marked Up Version of Amendments" (page i).

1. (Twice Amended) A method of delivering a therapeutic dose of a bioactive agent to the pulmonary system of a subject, in a single, breath-activated step, comprising:

administering particles comprising a bioactive agent, from a receptacle having a mass of particles, to a subject's respiratory tract,

wherein:

31

- i) the particles administered to the subject's respiratory tract have a tap density of less than 0.4 g/cm³;
- a) at least 50% of the particles have a fine particle fraction less than
 4.0 μm; and/or_
 - b) at least 75% of the particles have a fine particle fraction less than $6.8 \mu m$; and
- iii) at least about 50% of the mass of particles stored in the receptacle is delivered to the pulmonary system of the subject.
- 20. (Twice Amended) A method of delivering a therapeutic dose of a bioactive agent to the pulmonary system of a subject, in a single breath, comprising:

administering dry powder particles comprising a bioactive agent, from a receptacle having a mass of particles, to a subject's respiratory tract in a single breath, wherein:

- i) the particles have a tap density less than about 0.4 g/cm³; and
- ii) at least about 5 milligrams of the bioactive agent is delivered to the pulmonary system of the subject.

- 45. (New) The method of Claim 1 wherein at least 50% of the particles have a fine particle fraction less than 4.0 μm.
- 46. (New) The method of Claim 1 wherein at least 75% of the particles have a fine particle fraction less than 6.8 μm.
- 47. (New) The method of Claim 20 wherein at least 50% of the particles have a fine particle fraction less than $4.0 \mu m$.

Bo

- 48. (New) The method of Claim 20 wherein at least 75% of the particles have a fine particle fraction less than $6.8 \mu m$.
- 49. (New) The method of Claim 1 wherein said particles are spray dried particles.
- 50. (New) The method of Claim 20 wherein said particles are spray dried particles.
- 51. (New) The method of Claim 20 wherein the particles deliver at least 10 milligrams of the bioactive agent.

REMARKS

Claims 1 and 20 have been amended and new Claims 45-51 have been added. Claims 1-51 are pending.

Support for the amendments to Claims 1 and 20 is found throughout the specification.

Support for the recitation at least about 50% of the mass of particles stored in the receptacle is delivered to the pulmonary system of the subject in amended Claim 1 is found, for example, at page 5, lines 4-8, page 12, lines 25-27 and page 16, lines 5-7.

Support for the recitation "at least about 5 milligrams of the bioactive agent is delivered to the pulmonary system of the subject" in amended Claim 20 is found, for example, at page 5,
